Claude Code

Guide & Tips for Non-Programmers

VS >_ Py { } AI

← → to navigate | Space next

OVERVIEW

6 Skills to Unlock

VS Code
Your new supercharged editor

Command Line
Talk to your computer with text

Markdown
Format documents with plain text

Python
Automate anything

HTML / CSS / JS
Build websites & presentations

SKILL 1

VS Code

📁

File Explorer

Browse files in the left sidebar

✎

Editor

View and edit any file type

⌨

Terminal

Built-in command line

🔌

Extensions

Plugins for new abilities

🔍

Command Palette

Ctrl + Shift + P

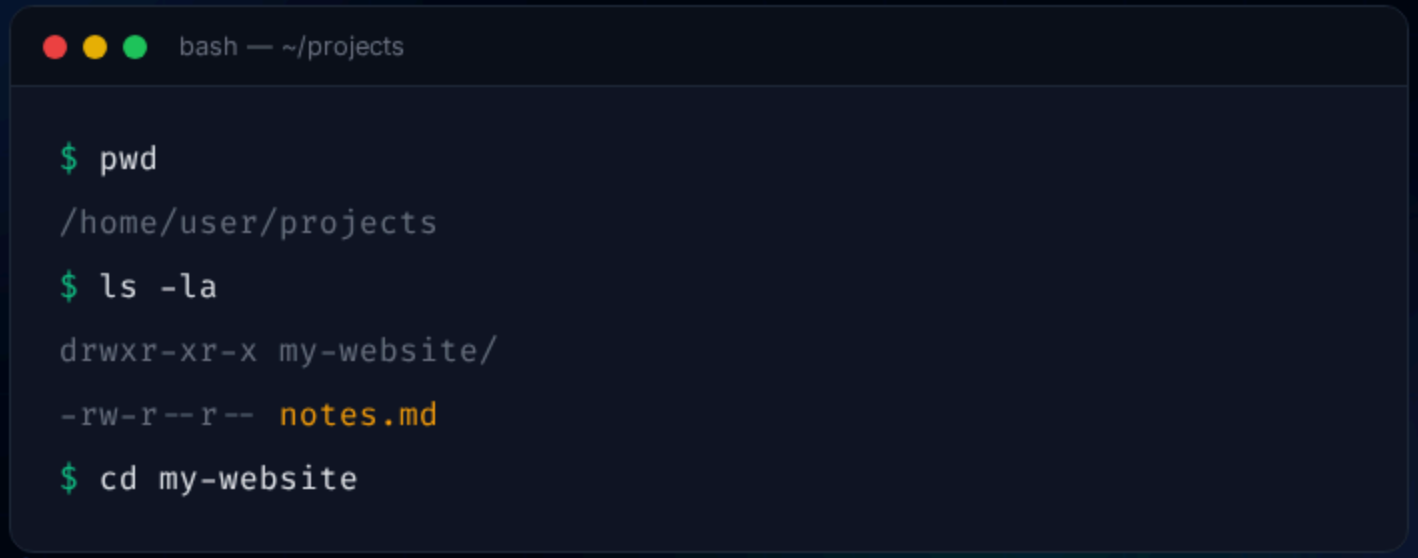
✅

Extensions Safety

Prefer verified publishers

SKILL 2

Command Line



SKILL 4

Python

analysis.py | data.csv

```python
import pandas as pd

# Read the spreadsheet
data = pd.read_csv("sales.csv")

# Show the total
total = data["amount"].sum()
print(f"Total: ${total}")
# Output: Total: $12,450
```

Install modules: `pip install pandas`

SKILL 5

HTML + CSS + JS

HTML
Structure & Content

CSS
Colors & Layout

JS
Interactivity

index.html

```
1  <h1style="color: blue">Hello!</h1>
2  <p>This is a paragraph.</p>
3  <buttononclick="alert('Hi!')">
4    Click me
5  </button>
```

SKILL 6

Claude Code

Talk to it. It does the work.

Create a website that shows my favorite recipes with a nice dark theme

I'll create that for you. I'm writing `recipes.html` with a responsive grid layout, dark color scheme, and cards for each recipe...

Make the cards have rounded corners and add a search bar at the top

POSSIBILITIES

What Can You Create?

Documents

Markdown notes, reports, meeting summaries

Scripts

Automate renaming, sorting, data processing

Websites

Landing pages, portfolios, tools

Presentations

Like this one! HTML slides from any text

Data Analysis

Read CSVs, calculate totals, make charts

Anything Else

Just describe it in plain language

Start Creating

You don't need to be a programmer.

You just need to describe what you want.

This entire presentation was generated by Claude Code from a markdown guide.
